Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses

(29CFR 5.5 (a) (1) (ii)).

In the listing above, the "SU" designation means that rates listed under the identifier do not reflect collectively bargained wage and fringe benefit rates. Other designations indicate unions whose rates have been determined to be prevailing.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
 Wage and Hour Division
 U.S. Department of Labor
 200 Constitution Avenue, N.W.
 Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
 U.S. Department of Labor
 200 Constitution Avenue, N.W.
 Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISION

C. INSPECTION WAIVER (revised 11-19-10)

This is not a bid item. The County requires inspection of materials and products and requires certifications from the manufacturers or suppliers for compliance with the specifications. Supplier's material certification shall be required for the following items:

Asphalt – Mix design required
Weight tickets
Prime and Tack Coats
Temporary Pavement Markers
Pavement Markings

The County will be responsible for the following job control testing:
Asphalt (extraction and compaction)

Submittal – Contractor shall submit certifications, signed by the material suppliers and the Contractor, that all materials meet specification requirements. Mix designs of asphalt mixes shall be submitted to the Engineer for approval, at least two weeks prior to placement of material and shall be field inspected by the Engineer during placement of the material. Certified weight tickets shall be provided for verification of quantity for asphalt. Independent assurance sampling of the asphalt will be performed by the Missouri Department of Transportation.

This waiver does not relieve the Contractor from compliance. The Contractor shall provide the materials for field-testing at no additional payment.

D. BITUMINOUS PAVEMENT MIXTURE PG64-22 (SURFACE LEVELING & TYPE BP-1)
(revised 11-19-10)

This bid item shall include all labor and material to construct a minimum 1" thick asphaltic level course (at the locations specified) and a 2" thick asphaltic surface course over the driving lanes as specified herein and in accordance with Section 401 of the above said Standard Specifications for pavement mixture shall be Type BP-1 as detailed in Section 401 of the above said Standard Specifications. The asphalt cement used in the mixture shall be PG64-22. Aggregate from the mixture shall be from a State approved ledge.

The job mix formula shall be submitted to the Engineer for approval, at least two weeks prior to preparing any of the mixture for the project.

The unit of measurement for this item shall be ton.

The unit bid price shall include all labor and material to furnish and construct the required courses of bituminous pavement over the driving lanes and as detailed within these specifications. The costs associated with cleaning or sweeping the road shall be included under mobilization.

The contractor shall remove all dirt, debris, and/or vegetation within the paving limits. After the areas designated for coldmilling of the joints have been performed (see Job Provision for COLDMILLING JOINTS below), the existing road and paved entrances shall be tack coated and the rock entrances shall be primed prior to laying the level course and/or surface course.

The contractor shall take care to insure that a compacted 1" minimum level course (at the locations specified) and a uniform 2" compacted surface course is provided. The level

course will have areas with greater than 1" to provide for the desired geometrics or superelevation. Some of these areas may require more than one lift. Section 401.8.1 Mixture Testing will be strictly adhered to. A uniform crown of 2% is desired on both the driving lanes, except in curves where a minimal superelevation slope ($\pm 4\%$) is desired, and where existing drainage patterns are to be maintained. The entrance wedge, applied by winging out to reduce the wedging hand work, may be laid the same pass with the driving lane. Compaction roller(s) shall begin as soon as the overlays can bear the weight with no undue displacement. The compacted mixture shall have a density of not less than 95 percent of that obtained by the laboratory compaction of a specimen made in the proportions of the approved mixture. Density will be determined by the direct transmission nuclear method in accordance with MoDOT Test Method T41 or by a specific gravity method.

The longitudinal construction joint between lanes for the surface course shall be at the center of the finished pavement (1 foot from the longitudinal construction joint in the surface leveling course).

All driving lanes, driveways and entrances shall be made accessible by an asphalt wedge on the same day that the leveling or surface course is placed. Refer to Section 401 of the above said Standard Specifications for specific details.

F. CONSTRUCTION JOINTS (revised 11-19-10)

This is not a bid item. Construction joints shall be formed at transverse joint locations by any method that will produce a vertical section the width of the roadway and shoulders and/or as directed by the Engineer. When the transverse vertical edge is to be left open to traffic, a temporary depth transition ramp with paper joints shall be placed to provide a smooth transition or as approved by the Engineer. When paving operations abut a construction joint, the ramp shall be removed and disposed of by the Contractor.

Longitudinal joints shall be placed in accordance with the Section 401.7.6 of the Missouri Standard Specifications for Highway Construction, 2004 edition and as modified by other job special provisions. **The contractor shall take into account that the existing centerline pavement markings may not have been placed at the true center of the roadway. The contractor shall make every effort to place the longitudinal joint of the final surface course at the true center of the roadway.** Temporary transitions ramps are not required to be installed along longitudinal joints not located at a road entrance or driveway.

The costs associated with non-coldmilling construction joints including the transition ramp, paper joints and removal/disposal of the ramp material shall be included under mobilization. Coldmilling joints are addressed in the job special provision "COLDMILLING JOINTS" and is a separate bid item.
