20. Project Details:

Jefferson County is proposing the following safety improvements to reduce crashes on the selected section of Flucom Road: adding 4', Type A3 shoulders to both sides of the roadway, center and edge line rumble strips, properly graded ditches, clearing of vegetation to improve site distances, and new enhanced warning signs in locations deemed necessary. Signs and posts will be retro-reflective for increased safety and meet all standards within the current edition of the MUTCD. The aforementioned safety improvements will help alert and give drivers additional time to react if their vehicle leaves the driving lane.
