12. Anticipated Utility Impact: Yes Internet Lightwave Communications

13. Approximate Utility Cost: \$ 0.00

14. Existing Bridge Rating and Load Posting: N/A

15. Construction Contract Award: \$ 2,030,671.00

Funding Source: 80% ARPA 20% Local

16. Contractor: PCX Construction

17. Estimated Construction Start Date: Winter 2025

18. Estimated Construction Completion Date: Fall 2026

19. Attachments: Final Plans

20. Project Details:

This project includes replacing the existing low water crossing structure along Boyce Lane with a new bridge. The existing low water crossing structure crosses Platin Creek at the confluence with Hocum Hollow Creek. The new concrete slab-on-pile bridge will cross Platin Creek a little further south to improve the alignment of Boyce Lane. The bridge barrier will be concrete with openings to account for flooding. Other improvements include guardrail installation, rip rap along the creek, and a cross culvert. This project is partially funded by an ARPA grant through Missouri Department of Natural Resources (DNR).
