Qualification Statement

DeSoto Ozark Electric Co., Inc. has been in business as an Electrical Contractor since 1976. We have experience in all aspects of electrical construction including the area of Design Build. Ozark currently employs 10 fulltime employees including office staff, General Forman, Forman, and Journeymen Electricians.

All licensing and permits are current and all employees are up to date on all OSHA and MSHA requirements and participate in random drug testing.

All DeSoto Ozark Electricians have completed a five year Apprenticeship Program. The program includes, pipe bending, motor control work, transformer installation , testing and troubleshooting, programmable logic controllers, fire alarm installation, security system installation, underground installation testing, and termination of 15 KV cable.

Other services include, bucket truck with up to 50 foot pole setting and repair. Crane and drilling up to 36 inch holes, meggering and Hi Pot testing along with underground cable locating. We have the ability to provide current status of panel boards, switches, duplex receptacles, motor control centers, and existing motors on line by Infrared Thermal Scanning.

Sincerely,

Paul Bradford VP

Re: Jefferson County Electrical Contractor Services

Dear Kristy Moss:

Reinhold Electric is interested in providing on call electrical services to Jefferson County. We feel our company is highly qualified for this type of service work. During recent years Reinhold has performed service work for over 25 different townships, municipalities, and counties. Some of the governmental bodies include St. Louis County, St. Charles County, and the state of Missouri. Reinhold Electrical is licensed in Jefferson County. Our electrical license number is E088.

Reinhold Electric was started by Jerry Reinhold in 1976. He still to this day performs day to day operations as the company's President. Over that time Reinhold has grown but still covets the daily service calls for corporations, governments, and residential customers. We provide a wide variety of electrical services including: high, medium, and low voltage work, data and fiber, fire alarm, etc.

Reinhold Electric has 25-30 service electricians performing on call service type work daily; many of which live and work in Jefferson County. By having that number of on call service electricians living and working in the area, our response time to emergency service is minimized. During normal hours, Reinhold will provide service with a one hour response time. During after hours, weekends, and holidays, our president, Jerry Reinhold, personally answers service type calls and dispatches one of our two on call electricians immediately. An emergency response during the after hours, weekends, and holidays is also a one hour response.

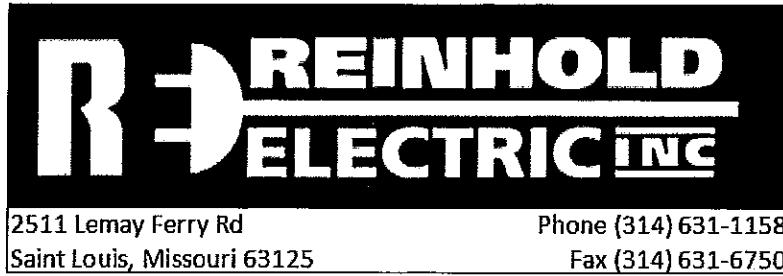

Reinhold Electric appreciates the opportunity to perform electrical services for Jefferson County. Attached you will find our standard company letter, insurance certificate and capacities.

If you are in need of any other information about our company, please do not hesitate to call. I can be reached at our office at 314-631-1158 or direct at 314-562-6104.

Thank you,

Mark Palmer

Thank you for taking the time to read over the following letter regarding Reinhold Electric, please consider us for your next electrical project. We provide all types of electrical service including Residential, Commercial and Industrial. Consider us for your next project, no matter how big or how small.

A family owned and operated business **since 1976**, serving Metro St. Louis and surrounding areas, including Illinois.

With three Missouri locations to serve you, the Corporate Office in St. Louis County, Lake St. Louis and Lake of the Ozarks. With over 200 trucks on the road providing experienced electricians.

Our professional office staff will answer your call, not an automated system.

Drug Free Environment: All new hires are required to submit to a drug screening and we have random screenings throughout the year.

Safety & Training: Our electricians attend OSHA certified training throughout their employment with Reinhold Electric. We provide various educational courses and safety updates throughout the year.

24 Hour Emergency Service: A live answering service takes your calls after hours. We have owners and electricians on call around the clock. Overtime rates will apply for calls made on the weekend, holiday or after regular business hours.

Free Estimates: Experienced Estimators are ready to meet with you. They will come out to your home or business and go over your repair need or problem. They can also give you an estimate by reading your plans.

Parking Lot Lighting: With several bucket trucks to service your parking lot lights, field lighting or canopy lights. Our Bucket Trucks are stocked with lamps and ballast.

Parking Lot Sealing: The sealing crew can stripe and seal parking lots and driveways.

Data Wiring: Install all types of data, fiber and perform testing.

Electrical Services: Installation of main service panels, outside meter sockets and service wires, receptacles, lighting, dedicated circuits, wiring for office partitions, etc.

Locating & Marking Breakers: Locate underground circuits and lines and properly mark the breakers in the panel.

Boring & Trenching: The Boring and Trenching Crew can go under surfaces not to be disturbed such as streets, parking lots, lawns, etc.

Generators: Installation of permanent generators or transfer switches. We also provide temporary generator power in case of a power outage at any time day or night.

UPS Systems: Install UPS system for computers or any other item that needs to be on a back up system.

Thermal Imaging Camera : Thermal imaging to capture hot spots detecting a potential problem behind walls or in panel.

Preventative Maintenance: Perform infrared testing on panels and breakers to prevent overheating problems. We tighten lugs on panels and breakers and inspect for any items of concern. We can perform electrical inspection as required by your city or governing body and will provide written reports of our findings.

Lamps & Ballast: The Supply House stocks many types of bulbs and ballast.

If you are currently working with an estimator, just give them a call to place an order or call direct to our warehouse at 314-416-0774.

RE: Jefferson County, 12-2015 – 12-2017 On-Call Electrical Services

Dear Jefferson County Department of Public Works:

Synergy is the interaction or cooperating of two or more organizations to produce a combined effect greater than the sum of individual efforts. Synergy Electric, LLC is among a partnership of 2 other companies, Synergy Concepts Inc. and Synergy Energy LLC. With this partnership we understand and offer a wholesome array of services from residential, commercial, and serving municipalities across the Midwest. Synergy Electric, was established in 2008 and is a licensed commercial, residential, and renewable energy electrical contractor, with offices in Missouri and Kansas.

Synergy Electric, LLC offers reasonable pricing, 24-hour emergency service and a 100% satisfaction guarantee. Our services are provided safely and efficiently with qualified and trained technicians. Synergy Electric, LLC is a member of the Independent Electrical Contractors (IEC) and follows their guidelines for training and safety. Synergy Electric, LLC has received the Grand Achievement level of the IEC Safety Award for the last 2 years. Synergy Electric, LLC has a current EMOD rating of .89.

Our Electricians have a broad on-job experience. They have experience working on telecommunication sites troubleshooting and solving any and all electrical issues that may occur, knowledgeable in residential and commercial electrical work, and installing renewable and efficient energy systems to providing entire new build electrical plan according to the latest codes. Our technicians take pride in their work and make sure all problems are solved before leaving a site.

Synergy Electric, LLC currently performs preventive maintenance and troubleshooting work on all of the AT&T on-site generators in the eastern half of Missouri. With past experiences with many large companies and municipalities such as St. Louis County, Wal-Mart, and telecommunication companies like AT&T, Sprint, and Verizon, the ability to get to site promptly and get problems fixed correctly, safely, and efficiently the first time is top priority. Working in response timeframes as well as repaired timeframes are things Synergy Electric is extremely familiar with and excel in.

Synergy Electric, LLC has an outstanding track record and very proud of our services provided. Working hand in hand with the current maintenance staff or upper management in the most professional way will guarantee satisfaction from everyone involved.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "S. D. Walters".

Steven D. Walters
