If it's got to be clean, it's got to be Tide. This deep clean formula is effective for pre-treating stains and penetrates every layer of a stain to help break it down and lift it away. Tide helps keep clothes looking like new longer than leading regular detergents, because it contains a special ingredient that reduces fuzzing, which causes a faded appearance on cottons.

Inhalation	Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Wash with plenty of soap and water. Get medical attention if irritation develops and persists.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Ingestion	In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth thoroughly.
Most important symptoms/effects, acute and delayed	Headache. Irritation of nose and throat. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Coughing. Skin irritation.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media	Alcohol resistant foam. Water spray. Water fog. Dry chemical powder. Dry chemicals. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurized container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire-fighting equipment/instructions	Move containers from fire area if you can do so without risk. Cool containers exposed to heat with water spray and remove container, if no risk is involved. Containers should be cooled with water to prevent vapor pressure build up.
General fire hazards	Extremely flammable aerosol.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Refer to attached safety data sheets and/or instructions for use. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Scoop up used absorbent into drums or other appropriate container. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water. Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
Environmental precautions	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Do not handle or store near an open flame, heat or other sources of ignition. Avoid contact with eyes. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Level 2 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. This material can accumulate static charge which may cause spark and become an ignition source. Do not handle or store near an open flame, heat or other sources of ignition. Store in original tightly closed container. Refrigeration recommended. Store away from incompatible materials (see Section 10 of the SDS). Level 2 Aerosol.

We are enclosing samples, which are being submitted in compliance with the above-referenced bid.

Please Note! The samples are in accordance with the specified strength. However, since these are the only bags that we have in stock at the present time, the size of some bags may differ with a couple of inches. Also, the color or seal of some bags may be different.

Upon approval of our bid we shall manufacture the bags exactly according to the specified size & color. The purpose of the samples is to test the strength of the bag and the material we are offering. These samples do serve this purpose.

All shipments made consistent with the enclosed samples will be deemed in full conformance with all bid specifications. We are relying upon approval of these samples for compliance of its bid and will ship only such bags, in the specified size/color. Acceptance of our bid shall conclusively constitute approval of the enclosed samples as conformity with bid specifications.

Futhermore, it is hereby understood that we are quoting the prices per the unit you have specified in the bid. However, as the table below indicates, we stock some items in a different pack. Therefore, unless you insist on your specified count, we may prefer to ship according to our standard pack. This will only expedite the delivery of your orders. Be advised, however, that we will not deviate without your definite approval.

NET WT. 18 OZ. (1 LB. 2 OZ.)

This is a potent hospital type disinfectant. It acts on bacteria-laden surfaces such as mattresses, (to render bacteriostatic), linen carts, refuse cans, metal beds and springs, draperies (to render bacteriostatic), wheel chairs, metal furniture, laundry chutes, air ducts, toilet seats, light switches, laundry hampers and other equipment after surface to be treated has been properly cleaned.

It is fast acting and continues to inhibit bacterial growth for a considerable time after spraying. Avoids the use of heavy or masking odors and will not dull the olfactory senses.

DIRECTIONS:

- For Disinfecting Hard Surfaces: Hold dispenser about 8" from surface to be treated and spray until wet.
- For Deodorizing: Hold dispenser upright and spray into air toward center of room for 6-8 seconds.
