RE: Proposed Jefferson County Animal Resource Center; Remodel + Addition
4848 State Route 30; House Springs, Missouri

Mr. Jonas:

This correspondence will summarize our proposed responses to RFI's. My suggested text is italicized, with any supporting info following that.

RFI's #1, #2, #3 from Kozeny-Wagner: Auto Fire Sprinkler system:

"Omit the requirement for Auto Fire Suppression shown in the Zoning and Code Review on Drawing sheet G.01. Fire area limits will be addressed by the use of fire-rated partition construction, 2nd floor construction (UL-L211) and ceilings (UL-P237)."

Although the plans call for Auto Fire Sprinkling, they also call for subdividing the entire building area into smaller than 9,000 square foot fire areas, which is the 2015 IBC limit for unsprinklered, "B" use, V-B type construction.

Therefore, auto fire protection systems do not appear to be required by IBC.

To create complying fire separation areas, it will be necessary to include 2nd floor construction that matches the two-hour rated partition construction throughout the new 2nd floor area. The plans & details reference UL tested assemblies as noted, although there do not appear to be any specifications for the fire-rated ceiling tiles or grid, or the floor topping mixture for the 2nd floor sub-floor.

RFI #4 from Kozeny-Wagner: Fresh Air Calculations:

"Include in the GC base bid the mechanical system as it has been designed and specified in the drawings and project manual / specifications."

RFI #5 from Kozeny-Wagner: Voluntary Alternates:

"Inclusion of Voluntary Alternates will not render a proposal 'Unresponsive' or 'Non-Compliant.' If Contractors wish to submit Voluntary Alternates, enclose in a separate, sealed envelope, signed, dated and sealed similarly to the bid form itself."

We do not reject Contractor proposals that include voluntary alternates. I consider these an indication of what they could do to lower the overall project cost, but we make no representation as to what

effect these alternates will have on contractor selection or calculation of base bids. Since Voluntary Alternates will necessarily not be consistent from one contractor to another, I'd suggest they submit any suggestions in a separate, sealed envelope for the Owner to consider when making their selection.

RFI #6 from Kozeny-Wagner: Medical Gas, Oxygen & Vacuum Piping Details missing:
Engineers are reviewing and will advise.

RFI #7 from Kozeny-Wagner: MEP Disciplines identified as 'Design-Build' in Spec's Table of Contents:

"Project Manual Table of Contents identifies Plumbing, HVAC and Electrical disciplines to be provided as 'Design-Build'. Disregard this suggestion, and provide the systems and equipment as shown in the project drawings and specifications."

RFI #8 from Kozeny-Wagner: Multiple items – Owner furnished materials, missing electrical and water supply call-outs:

"Project Materials to be furnished by Owner and Installed by GC will be ordered, received and stored until needed on site by the Owner. The Owner will provide storage on site, or delivery of the materials in coordination with the General Contractor."

"Plumbing piping diagrams may not indicate every required portion of required piping. GC shall however, include all water, drain, waste/vent piping required for each piece of GC-installed equipment, whether the specific piping run-out is shown in the plans or not."

"Electrical Power Plan may not indicate every required outlet or circuit. GC shall however, include all power circuits, outlets and/or connection boxes required for each piece of GC-installed equipment, whether the specific electrical power is shown or not."

"Accessories required for the installation of any GC-Installed item, equipment or system are to be included in the GC proposal. For instance, if equipment or system requires a sleeve through a foundation, the sleeve shall be provided and its installation coordinated by the General Contractor, whether the sleeve is shown specifically in the plans or not."

"GC shall coordinate with Owner's Vendors for all Vendor-Installed equipment. Provide adequate notice to such Vendors for their provision of any supporting construction not shown in the plans."

"Floor scale depicted in Detail #55 (Sheet A7.00) refers to equipment item #523 in the Veterinary Equipment List, and is to be installed in Room 126; exact location to be determined."

I think it will be easy enough for a plumber or electrician to include the piping or power for any piece of equipment he is installing, but if there is equipment installed by Owner that requires power or piping not shown on the plans, it would be unrealistic to expect them to include that in their proposal.

RFI #9 from Kozeny-Wagner: Gas Piping and Mechanical questions :

"LP Gas tanks and piping into building to be provided by Owner. GC to include piping from inside of building throughout facility as shown/as needed."

"The 'Scavenger' system (WAGD) is to be Owner-Furnished and Vendor-Installed in Room 151. Wiring, gas, piping, ventilation etc to this unit to be included in the GC Base Bid."

"Water supply/service is to be provided by the Owner. GC shall include backflow prevention, distribution within the building, and alterations needed to existing plumbing system to produce a complete, operable, code-compliant system."

"Owner to provide 1000 gallon sterilization basin and treatment system, including lids. GC to install Owner provided items, and provide and install the overflow alarms and closure valves compatible with the system. Coordinate with Owner for location and treatment system models/details."

I believe the trench drains shown in the plans are properly shown on the plumbing plan. The plumbing plan only shows the drop from the trench to the drain line, but I think that is how they are supposed to work.

RFI #10 from Kozeny-Wagner: Gas Piping and Mechanical questions :

"Data & Comm's outlets to be provided and installed as follows:

- At Locations shown in Owner's IT-Data Plan*
- GC to provide & install outlet boxes where shown, and data wiring per the Owner's plan from each device to the central switching equipment (located in Room ???).*

Owner's separate IT-Data Vendor will install outlets, switching equipment, and make all connections, in coordination with the General Contractor.

Provide power and controls for all exhaust fans to be provided or installed by the General Contractor. Coordinate final control locations with Owner prior to install. Assume controls for each fan will be located in same room as the exhaust equipment being controlled.

Provide power, water, drainage and exhaust for: (2) each laundry equipment items (#177 Washer/Extractor & #178 Commercial Dryer) in Room #175; and (1) each laundry equipment in Room #123 (166.01 Commercial Washer & 166.02 Commercial Dryer).

RFI #11 from Kozeny-Wagner: Builder's Risk Insurance:

"Owner will provide general property insurance and builder's risk insurance."

RFI #12 from Kozeny-Wagner: Request to delay bid deadline; under consideration

RFI #1 from Brockmiller: various bid form requirements:

"The Affidavit of Compliance with Prevailing Wage form is to be submitted at the conclusion of the project, and is not required to be submitted with the bid proposal."

Pre-Bid On-Site Meeting; May 30; 9:30 am;
4848 State Route 30; House Springs, MO 63501

Attended by:

Questions:

1. The Following areas of questions were raised at the meeting, and are addressed in Addendum #3:
 1. Will inclusions of Exceptions or Qualifications to Bids disqualify a Proposal?
 2. Sign-In Sheets from the pre-bid meeting will be transcribed and issued to attendees
 3. Will inclusion of voluntary alternates, qualifications or exceptions disqualify a proposal or render it 'Non-Responsive'?
 4. Who is responsible for receiving, unloading, inspecting, storing and delivering Owner supplied materials and equipment?
 5. Plumbing Plan does not include every run out of water or sanitary piping for all anticipated equipment.
2. If Additional Design or Engineering is required to omit part of the construction under Deduct Alternates #1 or #2, such as providing exterior sheathing and finish materials for an interior wall which becomes an exterior wall, those costs shall be reflected in the GC's proposed cost reduction. There should be no additional fees to the Owner to exercise either or both of the proposed deduct alternates.
3. Bid Form Schedule of Values:
 1. Is not required to be submitted at the bid deadline, but is required to be received by Owner (electronic document is acceptable) within 24 hours of the bid deadline.
 2. Provide at minimum, a breakdown of the proposed total cost apportioned among the major divisions listed, ie, 01-General Requirements, 02-Existing Conditions, etc.
