

**Jefferson County, Missouri
Response for
Assessor Collector System**

devnet edge™

AFFIDAVIT
(as required by Section 285.530, Revised Statutes of Missouri)

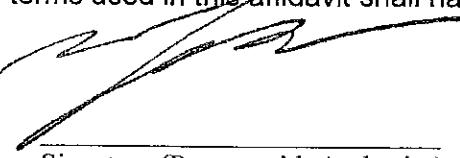

STATE OF Illinois)
COUNTY OF DeKalb) ss

BEFORE ME, the undersigned Notary Public, MICHAEL GENTRY
personally appeared who is PRESIDENT (Title) of DEVNET INC.

_____, (Company Name), and after being sworn did depose and say:

1. that said company is enrolled in and participates in a federal work authorization program with respect to the employees working in connection with the following services contracted between Contractor and Jefferson County, Missouri for the Assessor Collector System Project.
2. that said company does not knowingly employ any person who is an unauthorized alien in connection with the contracted services set forth above.

The terms used in this affidavit shall have meaning set for in Section 285.525 RSMo, Et seq.

Total Costs	\$321,175.00	\$193,050.00	

* Software Support and Training are annual fees for an unlimited number of hours. All training is done on-site and as needed. Telephone support is available through our toll free number from 8:00 a.m. to 5:00 p.m. Central Standard Time Monday through Friday. On-site support is scheduled as needed. After-hours and weekend support is available with at least 48 hours advance notice.

** DEVNET will convert current year and all historical years of real and personal property data as part of this pricing. Also included is current year CAMA attribute data conversion.

*** No sketch conversion will be required provided that Jefferson County has or can re-create the existing sketches in both image format (such as .jpeg) and vector file format. Should the County not be able to provide the existing sketches to DEVNET in both formats, a sketch conversion may be required. Costs associated with sketch conversion will be determined after the existing files have been reviewed.

File Conversion Specifications: Data should be provided to DEVNET in flat text files (delimited or fixed length fields), an Access database or Excel spreadsheets. File layouts are required if data is not provided with headings. Data files may be delivered to DEVNET in an electronic file sent to our online FTP site. Due to security on the FTP site, please contact us for details on providing an electronic file.

DEVNET will work in concert with the appropriate Jefferson County staff members to determine a timeline for data conversion, deliverables and payment schedules as part of the contract negotiations.

Third-Party Software Requirements

CAMA Sketch Software

All workstations performing sketch functions are required to license Apex® Sketch software. Apex® does not require workstations that *view sketches only* to be licensed. *If Jefferson County currently has five Apex sketch licenses, the purchase price below would not apply. However, the annual maintenance fee to upgrade current version 2.91 to Medina would be required as part of this agreement.*

Five (5) Apex Sketch Licenses @ \$545.00 per seat: **\$2,725.00 Year One**

OR

Five (5) Apex Sketch, Upgrade Fee @ \$215.00 per seat: **\$1,075.00 Year One**

CAMA View Image Licenses

All workstations having view image capabilities need to be licensed, whether on the in-house network or as field data collection hardware. Images include but are not limited to any scanned documents, deeds, and digital photography. This is a onetime third-party software cost, and there is no ongoing license fee for this software.

Five (5) Document Imaging Suite v14.5
with OCR and PDF @ \$150.00 per seat: **\$750.00**
Forty (40) Document Imagine Suite v14.5
@ \$75.00 per seat: **\$3,000.00**

Total View Image Licenses **\$3,750.00**

Marshall & Swift Commercial Calculator

6,000 Commercial Parcels
2010 Cost: \$1,400.00

Hardware Purchase from DEVNET is at the County's Option:

DEVNET does not require the County to purchase the Hardware from DEVNET, but does offer this as an option if the County is interested. Hardware may be purchased from any third party vendor of the County's choice. Please note that the county or third party vendor is responsible for setting up the file server and all required third-party software including Active Directory/domain and SQL.

Software Support

Software support covers a variety of issues regarding the Property Tax Administration System. Included with the software support contract is:

- ④ **User re-training:** Any training that takes place outside of the initial training period qualifies as software support. Most often, these training sessions are refresher courses for users on existing and possibly modified procedures.
- ④ **Documentation:** Documentation will be included with the property tax administration system in HTML format. As County procedures change, documentation will also need to change. Changes to this documentation fall under the terms of the software support agreement. Any changes to the documentation that may be incurred due to custom programming changes made to the system after the initial installation is also covered under software support.

REQUEST FOR PROPOSAL NOTICE ISSUED: 6-17-2009

JEFFERSON COUNTY, MISSOURI

Department of Administrative Services

	Total		\$80,215

This configuration is presented for the budgeting convenience of Jefferson County MO. Most government entities will take advantage of special pricing considerations given to local government by major hardware vendors. The supplied prices and configurations are subject to change without notice and do not include shipping charges or installation.

Notes:

- 1) Rack components may be eliminated from configuration if the County has existing rack infrastructure.
- 2) Disk array components may be eliminated from configuration if the County has an existing SAN resource.
- 3) Backup unit may be eliminated from configuration if the County has an existing backup solution.
- 4) Optional equipment, may be eliminated from configuration; web server can perform this function
- 5) One desktop workstation included in pricing for this response.

Manatron Microsoft SQL Server 2005 ISV Program

Manatron is licensed to sell Microsoft SQL Server 2005 processor licensing for exclusive use with our applications at a greatly reduced cost. The ISV licensing may also be used with other Microsoft software that would require the use of Microsoft SQL Server 2005. Listed below is Manatron ISV pricing and distributor pricing for Microsoft SQL Server 2005 product.

Manatron Microsoft SQL Server 2005 ISV Pricing:

Processor Licensing	Model #	Description	Unit Price	Extended Price
4	E65-00074	Microsoft SQL Server 2005 Standard Edition Win64 Processor license for PE R900	\$2,930	\$11,720
1	E65-00075	Microsoft SQL Server 2005 Standard Edition Embedded Maintenance (1 Year)	\$587	\$587
Total for processor licensing				\$12,307

9	Collector's module training	\$3,000.00	One week – on site includes travel and living costs
Custom Programming Rates for features unique to Jefferson County			
10	Senior Programmer	\$75.00/HR	
11	Programmer Analyst	\$50.00/HR	
10	Support Technician	\$35.00/HR	

Project Approach

VillaGIS, Inc. understands the challenge of transitioning between software platforms, both the technical and operational issues. Therefore we suggest Jefferson County replace the existing CAMA software with our new gAMA™ product. We understand that it is imperative to have a “bumpless” transfer of valuation data from an old to a new environment, while, at the same time, providing a pathway to a more modern real property valuation system. The gAMA™ real-property appraisal product we offer currently provides both Hunnicutt AND Marshall & Swift like cost approaches. We believe the transition from the current value system in use by Jefferson County to those derived using the Hunnicutt or Marshall & Swift like cost approach can be accomplished with minimum disruption. An integrated Collector's module will be included.

The Collector's module is currently under development and we will look forward to tailoring the system to meet the needs of the Jefferson County collector. In exchange for development guidance from the Collector, we plan to extend special pricing terms as described in the pricing section of the proposal. We are excited to work with Jefferson County in the development of this software, a process that has worked very well for us in the development of our real and personal property appraisal products.

Project Schedule

VillaGIS, Inc. suggests the following implementation activities and schedule:

Activity	Start Date	Finish Date	Dependency
Copy, migrate, and test existing CAMA and Personal Property databases	August 15, 2009	August 30, 2009	
Install CAPPSTM Software	August 15, 2009	August 18, 2009	Acquisition of document scanner and scan software. (estimated cost \$3,500)
Train Jefferson Personnel	Aug 15, 2009	Sep 1, 2009	
Install gAMA™ Software	October 15, 2009	October 15, 2009
