

Land Disturbance Performance Guarantee Worksheet

Stormwater Division, Jefferson County Department of Public Works

Land Disturbance Performance Guarantee

Project Name:
Prepared by:
This form is to be used to determine the performance guarantee amount required for a Jefferson County Land Disturbance Permit.

The performance guarantee will be calculated based off two factors:

1. The size of the land disturbance (acres rounded to the nearest tenth)
2. Length of a stream bank disturbance (lineal feet rounded to the nearest whole number)
(This is a bank measurement, therefore disturbing both banks of a channel will be the length of the stream x 2. A bank is considered “disturbed” if any work is being performed within the buffer strip or channel itself.)

Performance Guarantee Amount			
	Size	Unit Price	Cost
Land Disturbance	ac	\$3000 per ac	
Stream Disturbance	lf	\$140 per lf	
		Total:	

In the event of a default, per Section 505.270 of the County Code of Ordinances, the entire performance guarantee is considered in default and may be utilized to correct the deficiencies associated with the project.

If you plan on phasing out your project, that must be done at the beginning stages. If warranted, please consider breaking your project into phases at this time and provide a separate sheet that shows the Land Disturbance and Stream Disturbance values for each individual phase.
